

- 7 games were unanimous picks (last year there were only 3). Everyone picked the following:
 - o Utah State to beat Kent State
 - o Georgia Southern to beat Liberty
 - o Penn State to beat Memphis
 - o LSU to beat Oklahoma
 - o Florida to beat Virginia
 - o Cincinnati to beat Boston College
 - o Ohio to beat Nevada
- There were 4 games where all but 1 person picked the same team.
 - o Greta was the only one to pick Eastern Michigan to beat Pittsburgh
 - o Grandpa was the only one to pick Iowa to beat USC
 - o Amber was the only one to pick Oregon to beat Wisconsin
 - o Becca was the only one to pick Miami (Ohio) to beat Louisiana Lafayette
- Everybody picked LSU to win their Semi-Final, but the other Semi-Final was split- Jason, Grandpa, Greta, and Michelle picked Ohio State while Ryan, Becca, Damon, and Amber picked Clemson.
- 3 people picked Ohio State to win the National Championship (Jason, Grandpa, and Greta). Everybody else picked LSU to win it all.
- The four most similar duos are Becca and Ryan (35 out of 41 picks in common), Damon and Ryan (30 picks in common), Damon and Jason (29 picks in common), and Grandpa and Jason (29 picks in common).
- The four least similar duos are Becca and Greta (19 out of 41 picks in common), Greta and Ryan (19 picks in common), Jason and Michelle (20 picks in common), and Amber and Grandpa (20 picks in common).
- The overall “most unique” picker was Greta, who on average has 22 similar picks with the remaining seven people.
- The overall “least unique” picker was Damon, who on average has 26.6 similar picks with the remaining seven people.
- Greta was the “most unique” and Damon was the “least unique” last season as well.
- If all of the favorites (according to ESPN’s FPI predictions) win, then the winner would be Grandpa (31 correct picks), with Damon (29 correct picks) as the runner up.
- If all of the favorites lose, then the winner would be Michelle (18 correct picks) with the runners up being Becca and Amber (16 correct picks).
- With 41 games, there are 2^{41} , or 2.2 trillion possible outcomes. Based on a simulation of 100,000 outcomes, the percent chance each person has to win is:
 - o Grandpa: ~26%
 - o Damon: ~20%
 - o Jason: ~15%
 - o Amber: ~10%
 - o Ryan: ~8%
 - o Greta: ~4%
 - o Becca: ~4%
 - o Michelle: ~3%
 - o Tie: ~10%
